

MOJO SOUP

The Inside Soup

Issue No.3 | March 2023

March 2023

The month of March has been an exciting one for us. While we are always prioritising delivering great results for our customers in 'project mode', it is also critical that we spend focused time developing the growth strategy for our business. We are excited to share that part of that growth includes welcoming on 3 new team members next month to our team (stay tuned for more on them in April's Newsletter) as well as establishing a greater presence in the Sydney region (the focus of today's newsletter)!

We are excited to re-introduce one of our Principal Consultants and our Business Transformation team lead, Kat Lee. After spending 3 years with Mojo locally in Brisbane, Kat has made the move South both to be closer to family and to also support our efforts in supporting our Sydney customers. We have some exciting goals to expand our capability and team in the region and cannot wait to get connected. We can happily share that Kat's diary is wide open for coffee catch-ups, networking, or to dive into some problem-solving workshops with Customers, new and existing. If you're reading this and are based in or around Sydney or know of someone in Sydney that would benefit from introducing the connected brilliance Mojo Soup offers, please don't hesitate to reach out.

To further support our dedication to the region, our Leadership Team have made a commitment to travel to Sydney to reconnect with our customers and share our soon to be revealed Brand makeover in the new financial year. We are also looking forward to introducing you all to Kat as we are confident she will be able to talk through your challenges and get our technical team mobilised to start finding a solution that suits you best.

Sydney, get ready for us - we are looking forward to seeing you and making waves very soon!

Tech Spotlight

This month, we wanted to highlight two awesome tools that are working in progress from our friends at Microsoft. As a Microsoft partner, we are always keeping up to date on the innovative technology they are producing to not only help us but also our customers save time in their days. We like to think of ourselves as Microsoft experts (read: nerds) to do the research for our customers on what tools are worth investing time in learning and rolling out to their business.

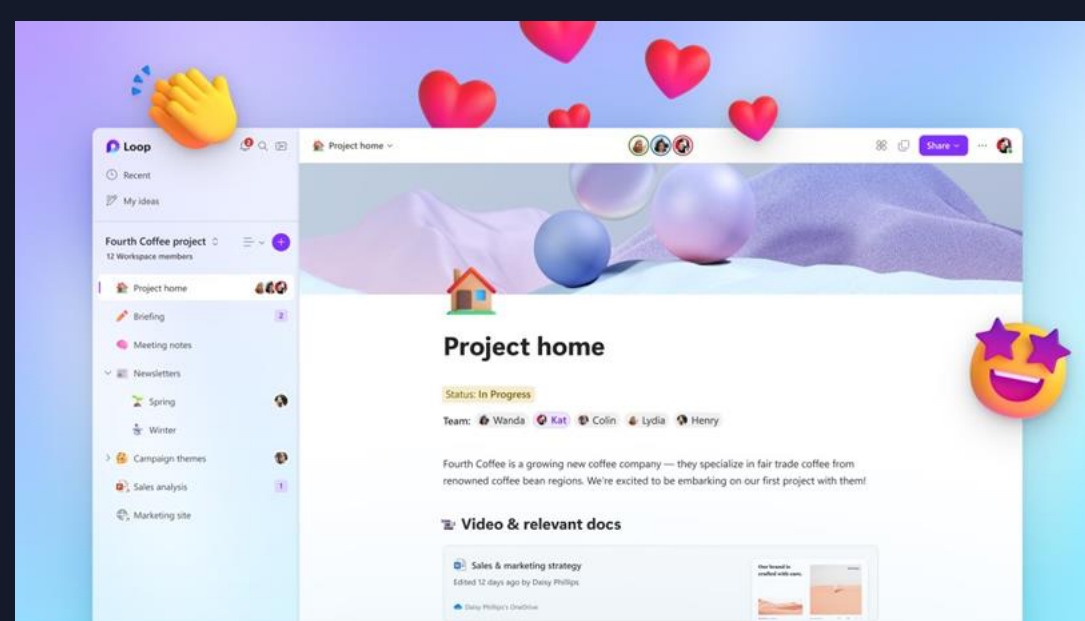

After some early previews of Microsoft Loop and Copilot, we can honestly say that these two tools are positioning themselves to transform the way we work. For starters, Loop is aiming to bring together the work you do across many workspaces and M365 apps into one consolidated place. Loop pages allow you to react and build off of ideas and maintain a flow of work across your projects.

Loop's goal is to help people think, plan, and create together like never before opens the door to endless possibilities in a world of modern, hybrid working. We cannot wait for this release to drop!

Copilot, which is available in Loop and across most M365 apps, allows you to collaborate with AI to receive suggestions that will help you set goals and pick out the most pertinent pieces of information you need to interact with. Copilot will change the way we operate and use software, its introduction is timely and we couldn't be more excited about the possibilities it offers as a productivity tool amongst other things.

If you want to get a head start on understanding these emerging technologies from Microsoft, here are a couple of links to get you started:

- Loop - <https://www.microsoft.com/en-us/microsoft-loop>
- Copilot - <https://blogs.microsoft.com/blog/2023/03/16/introducing-microsoft-365-copilot-your-copilot-for-work/>

Soupian Du Jour

Jay is our latest addition to the Mojo Soup team. Jay will be serving as our Power Platform Consultant, bringing a wealth of expertise to the table.

Let's get to know Jay!

What's something we wouldn't see on your resume?

I am a huge Manchester United fan and would love to visit Manchester to watch them live.

Most exciting about starting at Mojo Soup?

The most exciting aspect of joining Mojo Soup was the chance to explore innovative solutions harnessing multiple technologies. The collaborative environment has been a major boost in enabling joint learning and has been extremely beneficial in my development for solutions that I can deliver to a customer.

Last concert you went to?

I will be going to my first concert this month to watch Arijit Singh at Brisbane Convention Centre.
